### ABOUT US

On Jan 2015 Distribyte set out on a journey to simplify Cloud Computing.

As a group of highly trained geeks we believe that cloud computing is the enabler of all the cool technologies and trends that are changing our life today and in years to come.

Cloud computing today relies on complex architectures and a heavy set of presumptions. Starting from scratch enables us to create a cloud architecture that is simpler and more cost effective.

We invite you to share our dream and experience the magic.
